Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The abstract of the disclosure is objected to because it should be in the form of a single paragraph, and should not be in the form of a claim. Correction is required. See MPEP § 608.01(b).

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, it is noted that the lead wires 4 and 6, shown in Figure 2 of the instant drawings, are positioned for extending and retracting in opposite directions on the same spool 8, and it is not clear in the specification as to how the structure of the instant claimed invention is capable of such extending and retracting in opposite directions on the same spool.

3. Claims 6, 10 and 14-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language of claims 6 and 14-15 is not clear.

Claim 10 is a duplicate of claim 9.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Arai et al (US 5,706,353).

Arai discloses an audio device (Fig. 4) having all the features recited in the instant claims, including circuit 79, two ear pieces 58,59 connected by lead wires 61 that are wound onto spool 15; wherein, said spool is provided with a plurality of concentric tracks for associated with a plurality of contacts (see lines 52-62, column 7 of Arai).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-6 and 9-20 (6 and 14-15 as best understood) are rejected under 35 U.S.C. 103(a) as being unpatentable over Arai et al (US 5,706,353) in view of Boylan (US 4,942,617).

Arai is applied above.

Regarding the instant claimed arrangement of conductor tracks and contacts Applicant should consider the arrangement of conductor tracks and contacts of Boylan. In view of Boylan, it would have been obvious to one skilled in the art to provide conductor tracks and contacts on the spool of Arai, in a manner similar to that taught by

Art Unit: 3617

Boylan, because Arai does not describe the detail arrangement of his conductor tracks and contacts.

Regarding the instant claims 6 and 14-15 (as best understood), note that the contacts of Boylan engage the respective tracks on diameters at different radii.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 571-272-6682. The examiner can normally be reached on Mon-Fri (8:00-5:00).
